Passionate people create exceptional things

At Atlas Copco, we develop [industrial ideas](#) that empower our customers to grow and drive society forward – this is how we create a better tomorrow. We have [four business areas](#) in compressors, industrial-tooling, vacuum technology, and portable power equipment. Atlas Copco in the U.S. has over 5,000 employees and 100 locations.

We are [pioneers in technology](#) and engineering. There is hardly an [essential business](#) in the world that does not rely on Atlas Copco's products and services.

Position Summary:

You will support customers across your geographic region in a fully equipped company vehicle. You will perform onsite routine, preventative maintenance, and repairs on our range of industrial products. You will be part of a local, national, and global team working to support you with daily planning and solving more complex technical issues. You will have access to our dedicated training academies and will be mentored by experts as you grow your expertise and start your own individual journey.

Candidate Qualities:

We are looking for technicians with an affinity for working with industrial equipment and the ability to work autonomously with a customer-service mindset. If you are eager to learn new things and expand your capabilities and expertise, we want to meet you.

Job Description:

We currently have openings for technicians nationwide and across all business areas (compressors, tools, diesel powered equipment, and vacuum pumps).

- Always practice proper safety procedures and the correct use of personal protective equipment.
- Perform routine, preventative maintenance and repairs on Atlas Copco products in accordance with manufacturer's recommendations.

- Troubleshoot and perform diagnostics on equipment, determine possible causes for malfunctions, and perform repairs.
- Work side by side with customers to provide a high level of customer service, developing rapport with effective communication, interpersonal skills, and professionalism.
- Serve as an ambassador for the company, promoting the Atlas Copco “Way”.

Requirements

Experience

- Ideally, 1-2 years of technical experience maintaining and repairing various types of mechanical and electrical equipment. However, full training programs are offered if you meet the skills requirements.

Education

- High School diploma or equivalent
- Additional technical training in electrical, hydraulics, and/or pneumatics preferred

Skills

- Strong mechanical and electrical skills with demonstrated expertise in the maintenance, overhaul, and repair of a wide variety of industrial equipment, including electrical, hydraulics and/or pneumatics.
- Computer proficiency as required for communication, research, work orders and programming various controllers.
- Excellent customer service and communications skills (oral and written).
